DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hart (3,156,640) in view of Bellussi et al. (EP-340868).

Art Unit: 1764

Hart discloses a process for the simultaneous isomerization of olefins and hydrodesulfurization of a hydrocarbon feed mixture which has a boiling point within the gasoline range by contacting the feed mixture with catalyst comprising a metal from group VI (e.g., Mo), a metal from VIII (e.g., Co), and a silica-alumina carrier comprising at least 60 wt. % of silica wherein the total metals on the catalyst is in the range of from 0.5 to 15 wt. %. Hart also discloses that the sulfur content of the sulfur-containing hydrocarbon oil fraction is in the range of from 0.05 to 0.15 wt. %. (See entire patent)

Hart does not specifically disclose that the catalyst has physical characteristics as claimed. However, Bellussi discloses a composition of a catalyst which has the same physical characteristics as the claimed catalyst (see page 1 through page 4). Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the process of Hart by using a catalyst which has physical characteristics as taught by Bellussi because such a catalyst is effective in a process of isomerization of olefins.

Response to Arguments

The argument that because the catalyst of Hart is different from the catalyst of Bellussi, there is no motivation to combine the process of Hart and Bellussi is noted. However, the argument is not persuasive because one having ordinary skill in the art would have used the catalyst of Bellussi in the process of Hart because the Bellussi catalyst not only has equivalent function as the Hart catalyst but also is effective in a process of isomerization of olefins.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
